

Technical data sheet

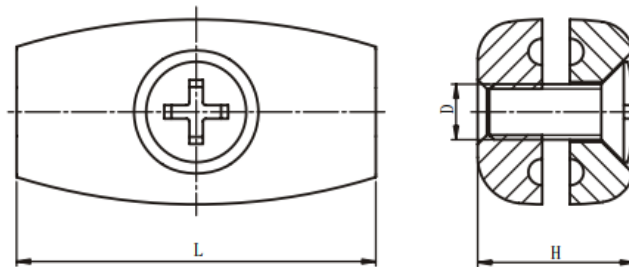

Title	Oval wire rope clip.
--------------	----------------------

1.- Purpose and field of application.

Oval wire rope clips are assemblies made of galvanised steel comprising two bodies, one of them with a threaded hole and the other with a housing hole for the joining screw.

This assembly allows the joining of two cables when the screw is tightened. They are also used to suspend loads.

2. Dimensions.

SIZE	D	H	L
	nom	Nom	Nom
2	M5	11	27.5
3	M5	11	27.5
4	M6	14	33
5	M6	15	33.5
6	M6	15.5	35

3- Installation and recommendations

Inspection of the clips is advisable before every use to ensure that:

- The body is not bent.
- There is no wear nor defects in the material.
- The screw is in good condition.

Not recommended for use with spiral cables.
